# UNIVERSITIES

case study: Tower Bar,  
location: University of Lincoln, Engine Shed.

Location: Tower Bar, Lincoln University.

Brief : The Engine Shed – Lincoln Universities fabulous live venue provided our design team with a wonderful challenge – to turn the Tower Bar from a cold, unwelcoming, inflexible open space into a warm and vibrant eye catching hub of student life.

The project concentrated primarily on softening and injecting colour within the seating area, to bring energy into this multiuse venue.

By introducing fixed seating with crackle glass screens and a raised seating area the open plan layout was broken down to create a more comfortable and inviting environment. Fabulous vibrant colours were used to accentuate the stylish timber furniture, bringing energy and character to the space, reflecting the wide customer base the venue attracts.
