

BARS & BACKFITTINGS

case study: Olive Bar
location: Sheffield City Centre

Brief : The aim was to modernise this city centre property and to bring in passing trade from the popular drinking street, in which it is situated.

The concept was to attract new custom throughout the day and night, for drinking downstairs and for meals within the restaurant upstairs.

IWCF worked alongside the customer to create the internal scheme, by working closely with the client we can take the look and feel within their imagination and turn it smoothly into reality.
