

UNIVERSITIES

case study: Ridge Bar
location: University of Sheffield

Brief : The Ridge Bar is part of the University of Sheffield 's new build venture aimed at reshaping student life. Primarily a food led bar catering for students & conferencing alike.

Our design brief was to pull together a finishes package including furniture, upholstery, paint & polish colours. The general feel of the interior was to be in keeping with the new build style: fresh & modern with clean lines & hard surfaces. The upholstery used was a combination of real leather & textured velvets creating another dimension to the space & providing splashes of colour against the stylish interior.
