

HOTELS

case study: The Carlton Park Hotel
location: Rotherham

Brief: From the devastation of a fire gutted shell the recreated interiors provide a fantastic referral for the specialised work carried out. Working in conjunction with both client and insurers IWCF quickly and efficiently refurbished and restored back to and beyond the former glory of this popular hotel bar.

Within the same time scale the client also requested IWCF construct and fit out a new build lounge extension and refurbishment of several function suites to provide an elegant and high class environment both internally and externally.
