

HOTELS

case study: Washingborough Hall Hotel
location: Washingborough near Lincoln.

Brief : The client requested that IWCF fully refurbish their Grade II Listed Hotel, in a phased programme of works. After recently purchasing the property the client felt the Hotel was in need of a full refurbishment to create a stylish interior, more in keeping with the graceful architecture of the building.

There was little building works required, however the interior of the Hotel was completely altered, working closely alongside Ed & Lucy Herring, IWCF altered the once cold, unwelcoming, mismatch interior into an elegant Country House Hotel. Within the phased contract all areas of the building were refurbished, the main reception, bar and residence lounge, the dining room and function room - suitable for both conferences and weddings.

With the final phases working into the bedrooms and restrooms.
